Here you can find the changelog of Cross Stitch Saga since it was posted on our website on 2016-12-29. The latest version is 3.9.2.1 and it was updated on 12/2023-01-19. See below the changes in each version: Improved efficiency and optimization Optimization in the drop-down list of the model legend (key): for an instant jump of color with a fewer points to the next color by the quantity - click on the rocket icon. Extended features of pattern transformation: mirror added flipping; Fixed reflected reading and rotating XSD decorative dots; Optimizing the group marking of dots/beads/ parking marks! Dialogue Bug Fixes on Older Androids - Extended Pattern Transformation Features: Mirror Flipping Added; Fixed reflected reading and rotating XSD decorative dots; Optimization of group marking of dots / beads / parking Bug-fixed marks: Half-point drawing on some older devices Application optimization, energy efficiency. Optimizing the rule display, added the ability to set a different color from the background for the rules (the color settings window is called by pressing the rule icon at length) Improved the model's response when moving with two fingers, etc. Library update. Calculator - Personalizing the order of thread numbers to be displayed in the pattern key (by flossing organizer) - Displaying the amount of floss and beads subtracting cross-stitching progression by the mark Rule settings - Selecting the display of the lateral rules: high-low/right-left (or all disabled) in the center of the cross-stitch pattern - Removing parking marks by a group Additional verification of the accuracy of the pattern files when they are loaded into the application. Added the ability to sort colors in the drop-down list of the pattern legend - by the amount of dots (from less than higher, and vice versa) on their typical layer. If the restriction zone is activated, the colors belonging to this area can be pinned, at the top of the layer in the list of pattern captions. When the restriction zone is activated, the colors are sorted by the amount of points in the area. Added information about the app-connected cloud storage account (Dropbox, Яндекс.Disk) and the ability to disconnect it from Cross Stitch Saga. - Bug-fix reading quarter points from PAT files. PCSitch Symbols 3 font update. It is now possible to change the thread quantity strands: fall list of the legend of the pattern - the wheel icon - the index tab. When thread strands are changed, thread estimates in the app's calculator are updated automatically. Fixed strands of threads loading information from XSD files for decorative points. It is now possible to erase the list of trademarks registered on cloud storage in the CrossStitchSaga\_progress folder from inside the Saga app. Optimizing the importation of 3/4 stitches from pat files (PC Stitch 6-10). Optimizing the 3/4 point appearance from xsd files when the Triangle for a quarter point setting is enabled in PatternMaker (when loading the xsd file into Cross Stitch Saga). Dropbox Library Bug-fixed updates! Additional adjustment of the grid thickness of the isolated cells of the Bug-fixed model In the drop-down list of pattern colors, you can view the original floss numbers of the palette or index numbers of the application calculator. An additional Яндекс.Disk cloud storage service is connected to download and record models and progress. It is estimated that the size of the grid is in the size of the design of the pattern. Bug. Pearls making Bug-fixed optimization Optimizing the app's graphics Correction of the restriction zone when the model is turned To change the application language, just go to the Cross Stitch Saga settings and make a choice: Russian or English. Bug-fix backstitches count in sprints You can now start several sprints at once. Fixing App Stabilization Important Update! Stabilization of statistics in the fall list the legend of the pattern added a point counter for each color per type. The Daily progress from cross-stitching marking in the model is complemented by custom sprints. Optimizing the marking, display and accounting of decorative stitches. The size of the finished embroidery is calculated in the points of the pattern, not on the grid size of the pattern. After the pattern is opened, the percentage of its marking progress is displayed on the main screen inside the heart Improved multi-insulation of dots by color. Faster loading of large multi-coloured patterns. Optimized sidebar interface. Crosspoint models opening speed-up.
